Our Product

Loose Mineral Wool

The Loose Mineral Wool is an ideal material for most insulation applications because of its favourable handling and application characteristics. It is fire resistant, moisture resistant.

Lightly Resin Bonded Mattress

Rock wool lightly resin bonded mattresses (LRB) consists of fine fibers spun from selected rocks melted at high temperature and bonded with a thermo setting resin.

Resin Bonded Slab

Resin Bonded Slabs (RB) is made of fine fibers spun from selected minerals melted at high temperature and bonded with a thermosetting resin.

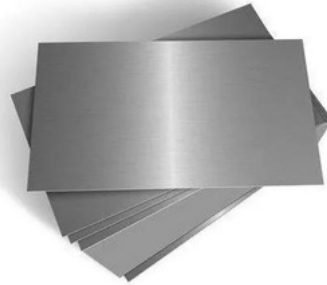

Our Product

Rock wool Pipe Section

Rock wool Pipe Sections are non-combustible, easy to cut, fit, handle and has high levels of thermal efficiency and strength. Each section is split and hinged for easy

Aluminium Sheet

Aluminium sheets are arguably among the most widely used types of abrasives and engineering materials today. This is largely due to some key aluminium sheet metal properties which, when viewed in combination

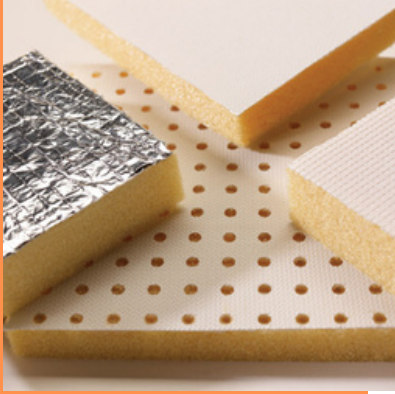

Aluminium Corrugated Sheet

Aluminium Corrugated Sheet has a wide range of uses much of our material is used for cladding of tanks and vessels, but can also be used as commercial cladding for buildings.

Our Product

Marine Insulation

Marine insulation is insulation that has been rated for use in marine applications, commonly found in the walls and ceilings of ships and ocean going vessels.

Fireproof Board

A fireboard or chimney board is a panel designed to cover a fireplace during the warm months of the year. The generated heat is reflected and follows the smoke outside through the chimney.

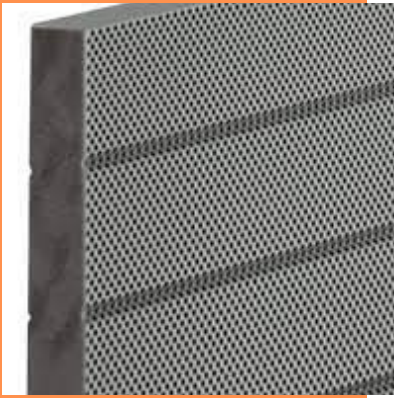

Spray Stonewool

Pressed into rolls and sheets, stone wool creates an incredibly effective insulation with sound-absorbing and fire-resistant properties.

Our Product

Exterior Acoustic Insulation

The product is not designed for this use, but some people have had success. Exterior Acoustic Insulation are designed to absorb sound waves in the room in which they are placed.

Stone Wool Roll

Pressed into rolls and sheets, Stone Wool Roll creates an incredibly effective insulation with sound-absorbing and fire-resistant properties.

Stone Wool Acoustic Insulation Board

Stone Wool Acoustic Insulation products offer strong airflow resistance, high levels of noise reduction and excellent sound absorption, due to their high-density qualities. Properly installed, even the noisiest infrastructure can be made quieter.

Our Product

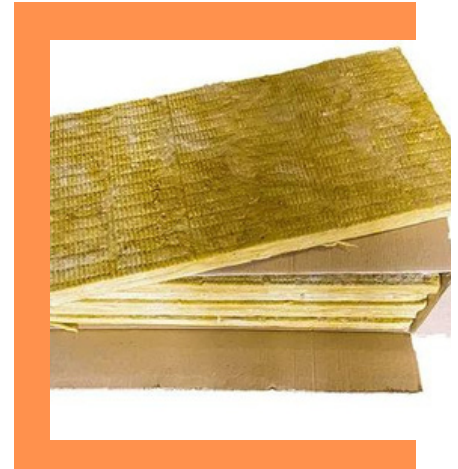

Mineral Wool Insulation

Mineral wool Insulation is commonly used to insulate exterior walls, basements, and heated crawl spaces. It can also be used in continuous insulation applications.

Inhibited Stonewool Insulation

Inhibited Stonewool insulation can withstand temperature up to 750°C which makes it best suited for various high temperature application requirements. They are also water repellent so it helps it to maintain its insulating value.

Rigid Boards

These are high density Sunrock Rigid boards made from high quality stonewool fibres bonded with thermosetting resin. RIGID BOARDS are high density thermal boards with high compressive strength.
